

ABINASH DEKA

Front-End developer

dekaabinash07@gmail.com

Madanryting, Shillong

ABOUT ME

I'm a front-end developer currently learning the MERN stack. I've built small projects using React.js and Tailwind CSS, and I enjoy working on clean, responsive user interfaces. Right now, I'm focused on improving my skills through hands-on practice and real-world projects. I'm looking for opportunities like internships where I can learn from experienced developers and grow step by step into a full-stack developer.

EDUCATION

NERIM GROUP OF INSTITUTIONS (2022-2025)

Project and Profiles

React Todo List App

React.js, Tailwind CSS, Vercel

- A responsive to-do list app with features to add, delete, and clear tasks
- Clean UI built using reusable components and Tailwind styling

Kanban Board UI (In Progress)

React.js, Tailwind CSS

- A Kanban-style board interface for task management with cards and columns
- Focused on mastering props, component reuse, and layout design

WORK EXPERIENCE

2025 (January-May)

Software Development Intern

Zephyr Solutions, Guwahati (Remote)

Jan 2025 – May 2025

- Collaborated with the development team using GitHub for version control and project coordination
- Contributed to front-end tasks and bug fixes under guidance
- Gained hands-on experience in real-world development workflow
- Received internship certificate upon successful completion
